RE: Southern California Edison Company's Request for an Extension to Provide a Response to Energy Safety's Annual Performance Report for SCE's 2024 Wildfire Mitigation Plan

Dear Mr. Doherty:

On October 1, 2026, the Office of Energy Infrastructure Safety (Energy Safety) published its 2024 Annual Performance Report (APR) regarding Southern California Edison Company's (SCE) implementation of its 2024 Wildfire Mitigation Plan (WMP). The APR states that SCE may file a response by October 15, 2026.

SCE respectfully requests a two-week extension—from October 15, 2026 to October 29, 2026 to file its response to the APR. The APR is a 108-page report that addresses a broad range of topics, including WMP initiative attainment for 47 different wildfire mitigation activities. Given the breadth of topics covered in the APR and the complexity of the issues, a thorough review requires research and coordination among numerous subject matter experts across SCE's organization. A two-week extension would provide the necessary time for SCE to review the APR and provide a meaningful response. SCE does not believe that this modest extension would prejudice Energy Safety or any other stakeholder.

Thank you for your consideration of this request.

Respectfully submitted,

/s/ Peter Shakro
