Re: **Non-Spatial Annual End-of-Year Tabular Data Resubmission**
Docket: 2025 Data Submissions

Dear Mr. Mohammed:

Pacific Gas and Electric Company (PG&E) hereby submits Revision 1 of its 2025 Annual End-of-Year (EOY) file. Pursuant to Energy Safety's Data Guidelines, Version 4.01 Section 2.4, Revisions to Previously Submitted Data, an electrical corporation that becomes aware of the need to revise previously submitted data must provide those revisions by the next quarterly submission date.

During finalization of the 2025 Annual Implementation Report (AIR), we identified potential discrepancies between previously filed WMP financials and current SAP totals for the 2023–2025 period. We initiated an independent, comprehensive review of all WMP-related costs to evaluate the accuracy and completeness of its filings. Based on that review, we identified that we have been reporting non-HTFD costs for Asset Inspections. We excluded non-HTFD costs for Asset Inspections in the revised AIR report we submitted in May 2026. We are now submitting an updated 2025 Annual End of Year report to match our 2025 AIR. We plan to exclude non-HTFD costs for Asset Inspections going forward, starting with our 2025 reports.

This submission consists of the following:

I. 2025 Annual EOY File

PG&E appreciates Energy Safety's consideration of 2025 End-of-Year Report Revision 1. Please contact me if Energy Safety requires clarification or additional materials.

Very truly yours,

/s/ Jay Leyno
