Re: KMPUD Wildfire Mitigation Plan Audit

Mr. Campbell,

At your request, the Amador Fire Protection District has reviewed the Kirkwood Meadows Public Utilities District (KMPUD) 2026 Wildfire Mitigation Plan. After careful review, we found the plan to be very comprehensive and complete. Potential wildfire threats from KMPUD electrical infrastructure are clearly identified along with appropriate measures to minimize those threats.

This concurs with KMPUD's commitment to meeting or exceeding the minimum industry standard for vegetation management practices. The fact that 95% of the current infrastructure is underground, leaving only 1.7 miles of overhead transmission line, the potential threat of wildfire has or will be properly mitigated.

The Amador Fire Protection District has completed our independent audit of the plan and found no issues. Please feel free to contact me with any questions or concerns at (209)-223-4979.

Respectfully,

Robert Withrow
FIRE CHIEF
