Re: **Comments of Bear Valley Electric Service, Inc. on 2022 WMP Update**
Draft Decision
Docket #: 2022-WMPs

Dear Deputy Director Semcer:

Bear Valley Electric Service, Inc. (BVES) respectfully submits these comments on the Draft Decision of the Office of Energy Infrastructure Safety (Energy Safety) on BVES's 2022 Wildfire Mitigation Plan Update (WMP). BVES appreciates the careful and thoughtful review of its 2022 WMP and looks forward to working with Energy Safety on the Areas for Continued Improvement.

Given that all of BVES's service territory is in a High Fire-Threat District, BVES takes the risk of wildfire very seriously. The Draft Decision recognizes the substantial progress BVES has made in reducing wildfire risk in the community we serve; however, we acknowledge that we must continue to progress in this area and are fully committed to doing so in our future plans.

Sincerely,

/s/ Nguyen Quan
