RE: CA 2025-WMPs  
OEIS-P-WMP\_2025-PC-19

Please find enclosed PacifiCorp's Response to OEIS Data Request 19.1.

If you have any questions, please call me at (503) 813-7314.

Sincerely,

          /s/            
Pooja Kishore  
Manager, Regulation

## OEIS Data Request 19.1

**Regarding PacifiCorp’s Vegetation Management Enterprise Systems:** On page 459 of its 2026-2028 Base WMP R1, PacifiCorp states that it “does not own an enterprise system to track its vegetation management initiatives.<sup>1</sup> PacifiCorp maintains a database used to track production metrics associated with vegetation management activities. This system is separate from the third-party work management system used in the field during inspection and correction of vegetation conditions identified during implementation of activities identified in Sections 9.2 include PacifiCorp Vegetation Management (PVM) and GIS.”

- (a) Indicate whether “PVM” as referenced in the statement above is:
- i. PacifiCorp’s “database used to track production metrics associated with vegetation management activities”.
  - ii. PacifiCorp’s “third-party work management system”.
  - iii. A separate and distinct database or work management system.
    1. If it is, explain.
- (b) Describe the process by which data are transferred, integrated, or synchronized among the “third-party work management system,” PacifiCorp’s “database used to track production metrics associated with vegetation management activities,” and PVM(if it is a separate database or management system.). The description should include:
- i. Whether data transfers are automated or manual.
  - ii. The frequency of data transfers, integration, or synchronization between systems and databases.
  - iii. Explain any data validation or quality-control procedures applied during data transfer or integration.

## Response to OEIS Data Request 19.1

- (a) PacifiCorp Vegetation Management (PVM) is a database used to track production metrics associated with vegetation management activities as submitted to PacifiCorp by its contractors.

---

<sup>1</sup> PacifiCorp, [2026-2028 Base Wildfire Mitigation Plan R1](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=59778&shareable=true), Published November 26, 2025, URL:(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=59778&shareable=true>).

- (b) PVM and the third-party work management system (MIF/VMOptix) are separate systems and are not directly connected; there are no automated or manual data transfers between them.

PVM relies on data provided by contractors through timesheets and invoices, and it is used for high-level information, including historical data, and cost tracking. In contrast, the third-party system captures more granular, field-level data recorded by end users.

While a formal, detailed comparison of the two datasets to reconcile inconsistencies is not currently performed through the course of regular business, discrepancies may be identified and addressed.
