**RE: PacifiCorp's Response to Notice of Non-Performance –
PAD_PC_RMA_20251007_1214**

Dear Patrick Doherty:

PacifiCorp provides the following response to the finding identified in the “Notice of Non-Performance, “*NON_PAD_PC_RMA_20251007_1214*” (NON) issued by the Office of Energy Infrastructure Safety (Energy Safety) on January 23, 2026. On October 7, 2025, Energy Safety conducted an inspection of PacifiCorp’s WMP initiatives in the vicinity of the city of Yreka, California.

Energy Safety found the following deficiency:

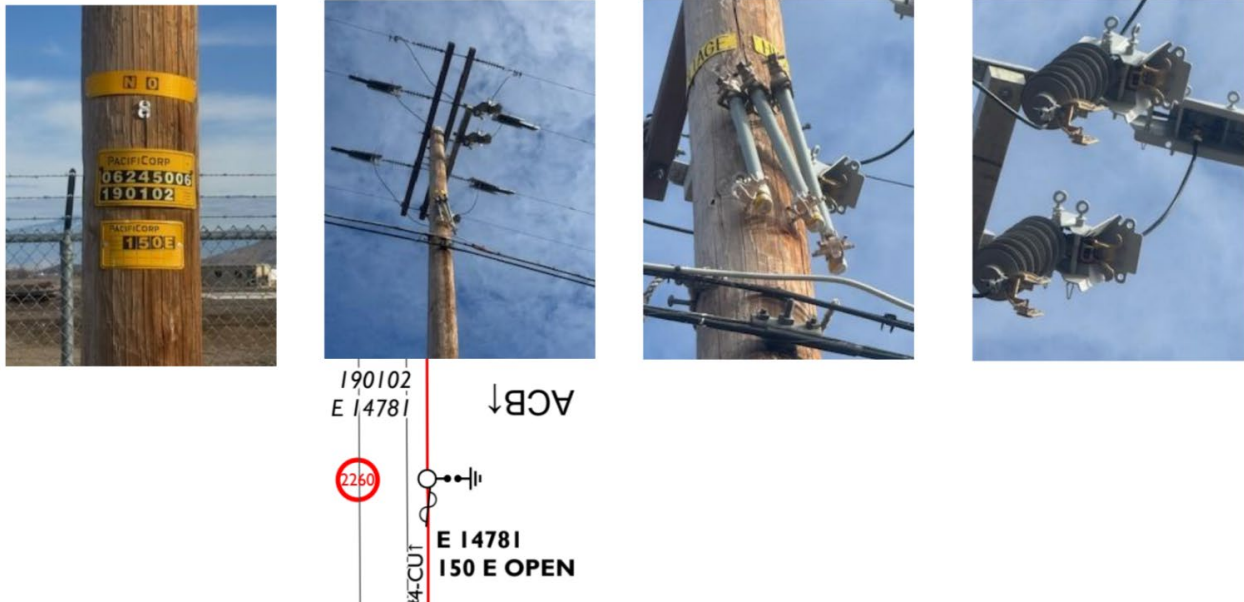

Deficiency 1. Energy Safety observed that in implementing the 2025 WMP initiative - 8.1.2.12 Expulsion Fuse Replacements, PC failed to complete the installation of CAL FIRE-approved non-expulsion fuses on Pole ID 6245006.0190102, Grid Hardening ID 7112939 at coordinates 41.72965220003691, -122.593214. Energy Safety considers this non-performance to be in the Minor risk category. PC must complete a corrective action for this deficiency by 12 months from date of this notice.

PacifiCorp Response:

In response to the notice of non-performance, the company conducted a field inspection on January 29, 2026. This location is designated as a Normal Open point; therefore, non-expulsion fuses should not be installed. However, the non-expulsion fuses are present on the pole and available for use if needed. The cutouts are installed as required.

5G149. 6245006.0190102

This pole appears to be a normal open in the system.
