Summary of Changes in the 2021 Wildfire Mitigation Plan (WMP) Update as Compared to the Prior Year's WMP

As required by California Public Utilities Code (PUC) Section 8387, Section (b)(1), the original City of Azusa WMP approved on June 15, 2020 was reviewed to identify i) deficiencies based on metrics, ii) changes in conditions, iii) new prevention technology, and iv) changes in law, and no such deficiencies, changes in conditions or law, or new prevention technologies were identified or required. As such, no changes were made to the body of the WMP pursuant to this June 2021 update. However, the Statutory Compliance Matrix presented as Exhibit D was updated to provide uniform context as requested by the Wildfire Safety Advisory Board's 2021 Guidance Advisory Opinion.
