

WILDFIRE RISK MODELING WORKSHOP

October 5 & 6, 2021

Introductory Remarks

Agenda

1. Safety Message
2. Workshop Objectives
3. Workshop Agenda
4. Next Steps
5. Workshop Logistics

Safety Message

- Be aware of your surroundings
- Stay hydrated & cool
- Know your evacuation route(s)
- Stand up and move
- Practice public health guidance
- Feel something, say something

Workshop Objectives

- Understand each utilities' current risk modeling efforts
- Discuss best practices for risk modeling with subject matter experts
- Increase transparency, alignment, and stakeholder input for utilities' risk modeling efforts
- Discuss the structure, purpose, and workplan for the Wildfire Risk Modeling working group

Workshop Agenda Day 1

10/5 Morning Agenda (9am – 12:25 pm):

- 9:00 – 9:10 am: Introduction
- 9:10 – 9:30 am: Modeling Working Group Presentation
- 9:30 – 10:50 am: PG&E Presentation
- 10:50 – 11:05 am: Break
- 11:05 – 12:25 pm: SCE Presentation

Lunch break from 12:25-1:25 pm

Workshop Agenda Day 1

10/5 Afternoon Agenda (1:25 – 4:30 pm):

- 1:25 – 2:45 pm: SDG&E Presentation
- 2:45 – 3:00 pm: Break
- 3:00 – 3:30 am: PacifiCorp Presentation
- 3:30 – 4:00 pm: Liberty Presentation
- 4:00 – 4:30 pm: Bear Valley Presentation

Workshop Agenda Day 2

- 9:00 – 9:10 am: Intro to Day 2
- 9:10 – 11:30 am: Q&A from Day 1 Utility Presentations
- 11:45 – 12:15 pm: Presentation by Wildfire Safety Advisory Board
- 12:15 – 1:15 pm: Lunch Break
- 1:15 – 3:00 pm: Wildfire Risk Modeling Panel
- 3:15 – 4:15 pm: Wildfire Modeling Working Group Details and Discussion
- 4:15 – 4:30 pm: Next Steps

Workshop Logistics

- Please save all questions for the utilities until the Q&A session tomorrow morning
- Keep comments and questions focused on the workshop topics
- Feel free to use the Zoom Q&A function
- All written will be saved for tomorrow's Q&A session questions

Utilities presentations were asked to include the following:

- An overview of your current ignition, consequence, and PSPS risk models, including any subsequent models and how each model is utilized
- Details of the components of each model, such as the inputs and data used, modeling assumptions and algorithms, and outputs including confidences and uncertainties.
- Changes being implemented and / or considered to your risk models for the 2022 WMP Update, along with an explanation
- Additional details as outlined in the workplan guidelines e-filed on 9/24
