SUBJECT: Bear Valley Electric Service, Inc. 2022 Wildfire Mitigation Plan Data Submittal

Mr. Marconi,

Pursuant to Energy Safety's Final 2022 Wildfire Mitigation Plan (WMP) Update Guidelines,¹ adopted on December 14, 2021,² utilities are required to submit their 2022 First Quarter (Q1) Quarterly Data Reports (QDRs) by May 1, 2022.

The 2022 WMP Guidelines provided a schedule and instructions for QDR submissions (included in Attachment 5), which required that non-spatial data submissions were to follow the schema of *Attachment 3: 2022 Performance Metrics Data Templates*. Further, the final 2022 WMP Guidelines removed the requirement for utilities to submit updated data, including 2022 and 2023 projections, concurrent with submission of a WMP.

Energy Safety reached out to Bear Valley Electric Service, Inc. (BVES) to request that all available spatial and non-spatial data associated with BVES's 2022 WMP filing be submitted on April 15, 2022. For any data that is not available on April 15, 2022, Energy Safety requested that BVES submits this as part of its Q1 QDR submission on May 1, 2022. In response to Energy Safety's request, BVES confirmed that the non-spatial data requirements can be submitted according to the timescale below:

¹ Energy Safety's Final 2022 WMP Update Guidelines (accessed February 3, 2022):

<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=51912&shareable=true>.

² Energy Safety formally adopted the 2022 WMP Update Guidelines on December 14, 2021, during a public meeting held pursuant to Government Code 15475.6. The meeting agenda, slide deck, and a link to the video recording can be found here (accessed February 3, 2022): <https://energysafety.ca.gov/events-and-meetings/events/adoption-of-the-2022-wmp-update-guidelines/>.

WMP non-spatial data requirements	Submission Date
Table 1	April 15
Table 2	April 15
Table 3	April 15
Table 4	April 15
Table 5	April 15
Table 6	April 15
Table 7.1	April 15
Table 7.2	April 15
Table 8	April 15
Table 9	April 15
Table 10	April 15
Table 11	April 15
Table 12	April 15 Partial Actuals for 2022 Q1 Year to Date (YTD) April 15 Projected 2022 & 2023 May 1 All Actuals for 2022 Q1 YTD

Based on the above, Energy Safety does not expect any data to be submitted with BVES's WMP filing on May 6, 2022, because it will have already been submitted either on April 15 or May 1, 2022. This is providing the data is submitted in the updated format and with the new breakouts (High Fire Threat District (HFTD), non-HFTD) and also includes projections.

Energy Safety appreciates BVES's cooperation and strict adherence to the timelines set forth above.

Sincerely,

Lucy Morgans
Program Manager, Electric Safety Policy Division
Office of Energy Infrastructure Safety
