Good Morning Stephanie,

There are a number of state agencies that currently have contracts in place for document accessibility services that can be found on [CMAS](#). One of the primary vendors that I found that a few state agencies contract with is [Access Ingenuity](#). Their pricing structure is as follows:

- For a contract with less than 10,000 total pages per year:
 - For simple documents (i.e., standard Word documents) = \$4 per page
 - For medium documents (i.e., with column text) = \$5 per page
 - For complex documents (i.e., with complex tables) = \$6 per page
 - For fillable documents = separate quote
- If we got a contract for more than 10,000 pages total per year, then price per page drops according to higher tiers of volume.

Please let me know if you have any questions.

Thank you,
Tyler
