

**CALIFORNIA UNDERGROUND FACILITIES SAFE EXCAVATION BOARD
INVESTIGATION DIVISION
INVESTIGATION REPORT**

DATE: May 5, 2022

CASE No.: 22LA01484

INCIDENT: Lack of operator response to ticket for more than a week

Violations:

Southern California Edison Company

Gov't Code 4216.3 (a) (1) (A): Failure to provide timely response to excavator

Gov't Code 4216.3 (c) (1) (A): Failure to provide electronic positive response

Charter Communications

Gov't Code 4216.3 (a) (1) (A): Failure to provide timely response to excavator

Frontier Communications

Gov't Code 4216.3 (a) (1) (A): Failure to provide timely response to excavator

Gov't Code 4216.3 (c) (1) (A): Failure to provide timely electronic positive response

19 CCR 4151 (c): Obstruction of an investigation

Yucaipa Valley Water District

Gov't Code 4216.3 (a) (1) (A): Failure to provide timely response to excavator

Sprint Communications Company

Gov't Code 4216.3 (c) (1) (A): Failure to provide timely electronic positive response

Executive Summary:

Frontier, Southern California Edison, and Spectrum responded late to a notification of excavation made by Merlin Johnson Construction, and Yucaipa Valley Water District did not respond at all, in violation of Government Code Section 4216.3 (a)(1)(A). Johnson was conducting water system upgrade work in Noble Creek Regional Park in Beaumont. Sprint/T-Mobile marked the area, but

failed to provide an electronic positive response, in violation of Government Code Section 4216.3 (c)(1)(A).

Futhermore, Frontier and Southern California Edison provided incorrect electronic positive responses, indicating that they had no subsurface installations in the area at substantially the same time as they told the excavator via a phone call that the area would not be marked until the next day, in violation of Government Code Section 4216.3 (c)(1)(A).

Frontier would not locate and mark a fiber line until after the installation of a tracer wire, sixteen days after the legal start date and time. During that period, Frontier provided another incorrect electronic positive response, indicating that the area was marked, when it had not been. Due to a lack of cooperation from Frontier, it is unclear that conduit repair was performed with a valid ticket and unclear whether Frontier acted expeditiously in attempting to mitigate the safety consequences of the unlocated fiber optic cable.

Scene Description

Various locations in Noble Creek Park

Investigation

On January 18, 2022, Merlin Johnson, President of Merlin Johnson Construction (CSLB License 467306, **Exh. 1**), filed a complaint alleging that Frontier Communications (Frontier) had not marked its facilities despite a start date and time of January 7, 5:01 p.m., and that he had sent “no response” notices each day with no response from Frontier. Johnson was performing a water system upgrade in Noble Creek Regional Park in Beaumont for the Beaumont-Cherry Valley Recreation and Park District.

Figure 1: Map images of Noble Creek Park. The satellite view on the left obtained from Google Earth. The map view on the right, identified in a ticket search of B220050037 on DigAlert’s website, shows the excavation area over the park area.

Johnson had notified DigAlert on Wednesday, January 5 of his intent to excavate, requesting a ticket with a legal start date and time of 5:01 p.m. on Friday, January 7 (**Exh. 2**). Johnson identified in the “Location” field of the ticket a “meet and mark” at 9:00 a.m. on January 10, identifying that the work area was various locations within Noble Creek Park. At 8:22 a.m. Friday, January 7, Spectrum, Southern California Edison, and Frontier provided electronic positive response identifying a negotiated marking schedule.

In an interview (**Exh. 3**), Johnson identified several reasons for the meet and mark invitation on the ticket. The work area identified on the ticket was approximately 20 acres, and it would not be attractive to mark up the entire area of the park. He’d delineated with flags and whiskers the specific areas in which he was working, but he thought it might nonetheless be confusing to locators without his guidance. Johnson stated that all operators contacted him by phone or showed up for the Monday morning meeting, with the exception of operators who used UtiliQuest.

Sprint Locate and Marks, but Does Not Provide Electronic Positive Response

Sprint did not provide an electronic positive response (**Exh. 2**), though Johnson indicated in an email that they had marked (**Exh. 4**). DigAlert electronic positive response data indicates that, of the 11,753 tickets Sprint (member code SPRINT1) received in 2021 that required a response, 231 were canceled prior to response, and it did not provide electronic positive response to 11,522 (**Exh. 5**). Sprint had not requested an extension to the January 2021 electronic positive response deadline per Section 4020 of Division 4 of Title 19 of the California Code of Regulations.¹ Attempts to use the phone number listed on the ticket to talk to someone knowledgeable at Sprint were unsuccessful (**Exh. 6**).

Yucaipa Valley Water Does Not Respond

Yucaipa Valley Water District did not respond to the ticket, through electronic positive response or otherwise. Johnson indicated that he'd done work for Yucaipa Valley Water and that they had no facilities in the area (**Exh. 3**). Mike Rivera, Public Works Manager for Yucaipa Valley Water, indicated that the ticket was out of Yucaipa Valley Water service territory (**Exh. 7**). Rivera indicated that they did not respond to tickets outside of their service area. Once the legal requirement was explained to him, including the electronic positive response requirement, and that an excavator may not know what Yucaipa Valley Water's territory is, Rivera stated that he'd tell his staff to respond to every ticket and would contact DigAlert to tighten up the area in which he was notified of tickets. DigAlert electronic positive response data indicates that, of the 2,350 tickets Yucaipa Valley Water (member code YVC01) received in 2021 that required a response, it responded to 13 indicating "no conflict," 28 were canceled prior to response, and it did not provide electronic positive response to 2,309 (**Exh. 5**). Yucaipa Valley Water had not requested an extension to the January 2021 electronic positive response deadline per Section 4020 of Division 4 of Title 19 of the California Code of Regulations.¹

Late Responses of Spectrum, Southern California Edison, and Frontier

At 10:13 a.m. on Monday, January 10, after the scheduled "meet and mark," Johnson made a "no response" notification through DigAlert (**Exh. 2**), and shortly thereafter he received a phone call from a UtiliQuest technician, in which Johnson agreed that he would not begin potholing until the morning of Wednesday, January 12 (**Exh. 8**).

UtiliQuest representatives contacted Johnson by email at 12:11 p.m. on Tuesday, January 11 to inform him that their technician had not yet marked the area and would arrive on location as soon as possible (**Exh. 8**). Johnson indicated that UtiliQuest had marked for Southern California Edison by the evening of Tuesday, January 11 (**Exh. 3**). Electronic positive response notifications confirm this, indicating that Southern California Edison Transmission

¹ Electronic positive response extensions: <https://energysafety.ca.gov/who-we-are/underground-safety-board/requirement-to-provide-electronic-positive-response-epr/>

Telecommunications and Southern California Distribution – Desert Region marked the area the morning of January 11. Electronic positive response notifications also indicate that Spectrum - Riverside responded with no conflict the morning of January 11 (**Exh. 2**). Member name “Spectrum – Riverside” (member code UCHTRW_S1) is a brand of Charter Communications, who is the DigAlert member responsible for the Spectrum lines (**Exh. 9**).

Frontier’s Unlocatable Fiber Line

At 3:46 p.m. on January 11, after Spectrum and Southern California Edison had provided electronic positive responses, Frontier responded “(014) PARTIALLY MARKED - MORE TIME IS NEEDED” (**Exh. 2**). At 5:50 p.m., Johnson emailed UtiliQuest and Frontier personnel suggesting that Frontier "pull out all the stops" to get facilities marked prior to beginning of work (**Exh. 10**).

On January 13, 14, 17, 18, and 19, Johnson made “no response” notifications to DigAlert identifying “**NO RESPONSE** FROM FIBR - CALLER CONFIRMS SITE IS DELINEATED” (**Exh. 2**).

Johnson called the UtiliQuest number for Frontier provided on the ticket on January 18 and was directed to contact Gabriel Gonzales, also of UtiliQuest (**Exh. 11**). Johnson called Gonzales, with whom Johnson was familiar from work on previous jobs, on January 19. According to Johnson, Gonzales informed him that they were waiting on Frontier, who had a fiber optics line without a tracer wire. UtiliQuest needed Frontier to install the tracer wire in order to mark the facility (**Exh. 3**). Johnson asked Gonzales for a Frontier phone number, but the number Gonzales provided to Johnson was the Frontier customer tech/repair department number (**Exhs. 3 & 12**).

Joseph Anton, Regional Manager of Claims and Compliance at UtiliQuest, indicated that the UtiliQuest technician locating for Frontier on January 11 identified a fiber line without a tracer wire through visual inspection of the line inside the structure (**Exh. 13**). At 4:18 p.m. pm January 11, Dochelle Lewis, for UtiliQuest, escalated made a client assistance request to Frontier regarding ticket B220050037 and requesting that Frontier notify her when the tracer wire had been installed (**Exh. 10**).

Johnson made further “no response” notifications to DigAlert on January 20 and 21. On Thursday, January 27, Jaime Meza of Frontier emailed Johnson to let him know that a crew would be installing tracer wire the following day (**Exh. 14**). Johnson verified that the area was marked on January 27 (**Exh. 15**).

Anton believed that Frontier had contractor SECC add a tracer wire, which was complete on January 27, with the exception of a 30-foot portion of conduit. The 30-foot section had conduit damage, and tracer wire could not be pushed through it (**Exh. 16**). Anton stated that Johnson was made aware of the 30-foot section that had not been marked (**Exh. 13**), which Johnson confirmed (**Exh. 17**).

Anton stated during the February 1 interview that he believed the conduit was to be repaired the next day, or February 2. When asked during the interview about who may have performed the conduit repair work, Anton stated that he didn't know, but that question could be asked of Frontier. Ticket information provided by DigAlert about excavations in the Noble Creek Park area from January 10 through February 28 did not indicate any excavation work in the area associated with the installation of tracer wire or the repair of damage to buried conduit (**Exh. 18**). Johnson indicated on March 4 that he did not believe any conduit repair had been done (**Exh. 17**).

When asked how UtiliQuest informed Frontier of the unlocatable line, he stated that it had been done through a form. When asked if he would provide the form, he said that he could not, but that it could be asked of Frontier (**Exh. 16**), and he provided the contact information for Frontier representative Bin Liang (**Exh. 19**). Mr. Liang is also listed as the Frontier contact for vacuum excavation on ticket B220050037 (**Exh. 20**).

Mr. Liang did not respond to emails requesting:

- The report that UtiliQuest provided to notify them of the unlocatable facility
- The names of companies performing installing the tracer wire and repairing the conduit, and whether any required excavation work, along with relevant ticket numbers
- Maps of the fiber line location
- A timeline of events from notification by UtiliQuest of the unlocatable line through installation of the line and conduit repair

(**Exh. 21**)

Anton indicated that UtiliQuest did what it could do: it located the lines, when it found an unlocatable line it passed that information to Frontier to address, and it kept the excavator informed of the situation (**Exh. 16**).

A timeline of communications between Johnson and Frontier may be seen in **Table 1**.

Day	Date	Time	Event	Exhibit
Wednesday	1/5/2022	6:56 AM	Johnson requests new ticket, indicating meet & mark 9:00 am Monday, Jan 10	2
Friday	1/7/2022	8:22 AM	Spectrum, So Cal Edison, and Frontier provide EPR identifying a negotiated marking schedule	2
Monday	1/10/2022	10:13 AM	Johnson submits a "no response" ticket to DigAlert, identifying cable, electric, and fiber as no-show to meet & mark and provided no marks	2

Monday	1/10/2022	10:26 AM	Spectrum, So Cal Edison, and Frontier provide EPR stating "clear - no conflict"	2
Monday	1/10/2022	11 AM approx	UtiliQuest technician contacts Johnson stating that he'll be able to provide marks by the afternoon of 1/11. Johnson agrees.	3, 16
Monday	1/10/2022	3:51 PM	Spectrum, So Cal Edison, and Frontier provide updated EPR stating "scheduled meet with excavator at requested date and time"	2
Tuesday	1/11/2022	10:52 AM	Spectrum provides EPR indicating "clear - no conflict." So Cal Edison provides EPR indicating "locate area marked." Frontier provides EPR indicating "partially marked - more time is needed."	2
Tuesday	1/11/2022	12:11 AM	UtiliQuest personnel contacts Johnson notifying him that their technician has not yet marked and would arrive on location as soon as possible.	8
Monday	1/11/2022	4:18 PM	Dochelle Lewis of UtiliQuest sends email to Frontier requesting an email when tracer wire had been installed	10
Tuesday	1/11/2022	5:50 PM	Johnson emails UtiliQuest and Frontier personnel suggesting that Frontier "pull out all the stops" to get facilities marked prior to beginning of work	10
Thursday	1/13/2022	4:46 PM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show and that excavator has not agreed to more time	2
Friday	1/14/2022	2:43 PM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Monday	1/17/2022	5:34 AM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Tuesday	1/18/2022	7:02 AM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Tuesday	1/18/2022	4:32 PM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Tuesday	1/18/2022	5:00 PM	Johnson submits complaint to Board	
Wednesday	1/19/2022	8:42 AM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Wednesday	1/19/2022	9:13 AM	Johnson emails UtiliQuest and Frontier personnel that he has not received	10

			response "as to if or when" facilities would be located	
Wednesday	1/19/2022		Johnson contacts Gabriel Gonzales of UtiliQuest, who indicates that they are still waiting on Frontier	24
Thursday	1/20/2022	6:23 AM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Friday	1/21/2022	8:55 AM	Johnson submits a "no response" ticket to DigAlert, identifying fiber as no-show	2
Thursday	1/27/2022	3:12 PM	Jaime Meza of Frontier emails Johnson to let him know that a crew will be installing a tracer wire the following day	14
Friday	1/28/2022		Anton receives an email from Frontier's contractor indicating that tracer wire work was done	16
Monday	1/31/2022	8:18 AM	Johnson submits a renewal ticket	2
Thursday	2/3/2022	4:44 PM	Johnson requests remarks from electric, cable, telephone, and fiber	2

Table 1: Timeline of communications between Johnson and Frontier.

Incorrect Electronic Positive Responses

On January 21, Johnson indicated that he'd received an electronic positive response from Frontier indicating the area had been marked even though he saw the area and the portion that still needed to be marked was not marked. The electronic positive response was transmitted to him by DigAlert via automated email as soon as the response was made (**Exh. 22**). DigAlert sends automated emails to excavators listing the electronic positive responses after the legal start date and time and subsequently, when any operator submits an electronic positive response after the legal start date and time (**Exh. 23**).

Johnson stated that he contacted Gabriel Gonzales at UtiliQuest, a representative of Frontier, and Gonzales agreed that the area that needed marked was still not marked (**Exh. 24**). When asked about the response, Anton stated that the response may have been in error, and that the appropriate response should have been that the area was partially marked, and that more time was needed (**Exh. 16**).

The electronic positive response by Frontier on January 21 was not the only incorrect electronic positive response issued for ticket B220050037. Spectrum, Southern California Edison, and Frontier all responded to version 01B of ticket B220050037 with "(001) CLEAR - NO CONFLICT" at about 10:42 a.m. on January 10. At about 3:52 p.m., each changed their responses to "(053)

SCHEDULED MEET WITH EXCAVATOR AT REQUESTED DATE AND TIME” (**Exh. 2**) following discussion between Johnson and a UtiliQuest representative, in which Johnson agreed that he would not begin potholing until the morning of Wednesday, January 12 (**Exh. 8**).

The initial electronic positive response was demonstrated to be incorrect for Frontier, as Frontier would respond “(014) PARTIALLY MARKED - MORE TIME IS NEEDED” at 3:43 p.m. on January 11, as discussed above. The electronic positive response was also incorrect for the two Southern California Edison divisions (SCE DIST - DESERT REG and SCE Trans Telecom), who at 10:52 p.m. on January 11 indicated “(010) LOCATE AREA MARKED.” Anton did not respond to an email requesting the reason why incorrect electronic responses were made on January 10 (**Exh. 25**).

Findings

I. The legal start date for the new ticket (B220050037-00B) was Monday, January 10

While the legal start date and time indicated on the ticket was 5:01 p.m. on Friday, January 7, Johnson Construction identified a “meet and mark” in the location field of the ticket of Monday, January 10, at 9:00 a.m. This constituted an agreement on the part of Johnson Construction that facilities would not need to be marked until that time. Spectrum, Southern California Edison, and Frontier electronic positive responses on January 7 identifying a negotiated marking schedule reflect the January 10 start date.

II. Spectrum, Southern California Edison, Frontier, and Yucaipa Valley Water are in violation of Government Code Section 4216.3 (a)(1)(A)

At 10:13 a.m. January 10, after the 9:00 a.m. “meet and mark” identified on the ticket, Johnson Construction sent made a “no response” notification with DigAlert for cable, electric, and fiber. Only afterward did Spectrum, Southern California Edison, and Frontier contacted Johnson Construction. That Johnson Construction later told the Spectrum, Southern California Edison, and Frontier January 10 that he would not begin potholing until 7:00 a.m. on Wednesday, January 12 does not impact their obligations under Government Code 4216.3 (a)(1)(A) to respond to the excavator prior to the legal start date and time.

Furthermore, Frontier did not complete marking until January 27.

Yucaipa Valley Water did not respond to ticket B220050037-00B because the work area was out of Yucaipa Valley Water's territory. Yucaipa Valley Water may change its notification area. Yucaipa Valley Water must respond to notification it receives pursuant to Government Code 4216.3 (a)(1)(A).

III. Sprint/T-Mobile is in violation of Government Code Section 4216.3 (c)(1)(A)

Sprint responded to B220050037-00B but did not provide electronic positive response. One-call center data from 2021 indicates that, while Sprint provided electronic positive responses in USA North 811 territory in 2021, Sprint did not provide electronic positive response in DigAlert territory in all of 2021, though it had not requested an extension to the requirement. All operators are required to provide electronic positive response pursuant to Government Code Section 4216.3 (c)(1)(A).

IV. Frontier's failure to cooperate with the investigation impairs the Board's ability to determine if conduit repair was performed in accordance with Government Code Section 4216 et seq. or to determine whether the timeline for locate and mark completion was reasonable or excessive.

Information from UtiliQuest indicated that Frontier was performing conduit repair—which would be expected to require excavation—but DigAlert did not identify tickets in the area that would indicate such work. The excavator stated that he did not believe that Frontier had performed the repair work. As Frontier chose not to identify the contractors performing the work, provide tickets for the work, or acknowledge that work was being performed at all, it could not be determined whether conduit repair occurred to make that section of fiber optic cable electromagnetically locatable was being conducted according to the requirements of Government Code Section 4216 *et seq.*

Frontier did not indicate to the excavator that the locate area was marked until January 27, twenty-one days after the ticket was issued on January 5 and 16 days after the legal start date of January 10. Both the excavator and Frontier's UtiliQuest representative stated that Frontier needed to install tracer wire in an "unlocatable" conduit containing fiber optic cable, but Frontier chose not to provide a timeline that could have indicated whether Frontier acted expeditiously in attempting to mitigate the safety consequences of the violation.

V. Frontier and Southern California Edison provided incorrect electronic positive responses on January 10, and Frontier again provided an

incorrect response on January 20, in violation of Government Code Section 4216.3 (c)(1)(A).

Frontier and Southern California Edison initially told the excavator, on the legal start date of January 10, through electronic positive response, that they did not have subsurface installations in the work area. This is despite, as substantially the same time, a locator representative of Frontier and Southern California Edison telling the excavator that he would be able to provide marks by the next day.

On January 20, Frontier provided an electronic positive response indicating that the area was marked, when it had not yet been, providing the excavator an opportunity to strike the line. The excavator received this response via a DigAlert email and only found out that it was incorrect after going to the site and calling a representative of Frontier to confirm that the area was not yet marked.

These incorrect electronic positive response notifications are in violation of Government Code Section 4216.3 (c)(1)(A).

**CALIFORNIA UNDERGROUND FACILITIES SAFE EXCAVATION BOARD
INVESTIGATION DIVISION
INTERVIEW REPORT**

REPORT DATE: 1/19/2022

CASE NO: 22LA01484

DATE/TIME OF INTERVIEW: 1/19/2022 4:15 PM

LOCATION OF INTERVIEW: Phone

NAME/ADDRESS OF INTERVIEWEE:

Merlin Johnson,
P.O. Box 777
Mentone, CA 92359
Tel: 9093226061

NARRATIVE:

I spoke with Merlin Johnson, President of Merlin Johnson Construction, Inc., regarding the project he was performing and the timeline of responses from operators to ticket B220050037 and its revisions. I told Mr. Johnson that I would be asking him questions about the electronic positive responses to the ticket and its revisions. I asked him if he was familiar with electronic positive response and if he reviews the responses, and he stated that he is familiar with it and does review the responses.

I asked about the project that he was performing, and he said that he was performing a water system upgrade for Beaumont-Cherry Valley Recreation and Park District in the Noble Creek Regional Park.

I asked about the "meet and mark" directions in the location description on the ticket. Johnson stated that, while the ticket was due at 5:01pm on Friday, January 7, they weren't going to begin working Friday night, and so he requested a meet for Monday morning January 10 at 9am to discuss marking. He stated that the work area was approximately 20 acres, and that it wouldn't be attractive to mark up the entire park the entire area identified in the ticket. He'd carefully delineated with flags and whisksers the specific areas in which he was working, but thought it might be confusing to locators without his guidance. Johnson stated that everyone had contacted him by phone or showed up for the Monday morning meeting with the exception of the operators using UtiliQuest.

He had received a phone call from the UtiliQuest technician requesting more time to mark. He stated that so long as the work was done the evening of January 11, it was fine with him, as he was not to begin potholing until the morning of January 12 (Wednesday). He indicated that UtiliQuest had marked for Southern California Edison on Tuesday night (1/11) but not for Frontier. I asked Johnson if the "Negotiated Marking Schedule" listed on the EPR for Spectrum, the two Edison units, and Frontier was accurate, and he indicated that the potholing discussion constituted in his mind a negotiated marking schedule.

Upon Frontier not marking prior to January 12, Johnson began submitting no response tickets. He tried contacting Frontier using the phone number on the ticket, but that went to UtiliQuest. He contacted Gabriel Gonzales at UtiliQuest, who he is familiar with from work on other jobs on January 19, and Mr. Gonzales stated that they were waiting on Frontier. According to Gonzales, Frontier had a fiber line without

tracer wire and needed to address the situation so that UtiliQuest could mark. Johnson asked Gonzales for a Frontier phone number, but the number Gonzales provided to Johnson was the Frontier customer service line. I asked if the electronic positive response Frontier provided to revision -01B of the ticket—"Partially Marked—More Time is Needed"—was accurate insofar as whether Frontier had partially marked. Johnson said yes, that was true—UtiliQuest marked for Frontier in some places, but did not mark the most important area—the fiber line.

I noted that Yucaipa Valley Water did not provide an electronic positive response to the -00B ("NEW") version of the ticket. I asked if they had ever responded. Johnson said that they had not, but that they didn't have any facilities in the area. He stated that he'd worked for them before and was familiar with the location of their system.

Subject: RE: Complaint C220180003; Case 22LA01484 -- Request for information
Date: Thursday, January 20, 2022 6:07:25 AM

Tony,

Sprint **DID** respond both by phone and marked their facilities. The Sprint facilities were not within the limits of our construction area, but they marked them anyway. The Tech. from print responded to the first two or three "No Response" Tickets that I sent in. I then explained what was going on and told him that he did not need to respond to the "No Response" Tickets anymore.

Let me know if you have additional questions.

THANKS

Merlin Johnson

Merlin,

Thanks for talking with me today. In reviewing the electronic positive responses again for the different revisions of the ticket, I noticed that Sprint did not respond to the new ticket (B220050037-00B) or any of the subsequent revisions. Did Sprint ever respond to you? If so, by what means did they respond (phone, email, etc) and how did they respond (locating and marking, no conflict, etc)?

Thanks,
Tony

Mr. Johnson,

I am reviewing the documentation you sent today. Would you have time 3pm or later for an interview? There are some questions regarding Frontier/UtiliQuest electronic positive responses I'd like to ask about, in addition to me asking general questions about the project.

Thanks,

Tony

Subject: RE: Complaint C220180003; Case 22LA01484 -- Request for information

Thank you Mr. Johnson. Could you send the email string from 1-11-22 in a way that doesn't come from a scanned image? We're having trouble making it ADA accessible, which we'll need if it is necessary in the final report. If you can convert it to a pdf within outlook, that would be great. If not, a .msg file should be fine as well.

Thanks,
Tony

Subject: RE: Complaint C220180003; Case 22LA01484 -- Request for information

Mr. Marino,

Thank you for returning my call this morning. Attached you will find the following:

1. Copy of the original USA Ticket for the project.
2. Email string from 01-11-22.
3. Email string from 01-19-22.
4. Narrative of conversations.

NARRATIVE

In the original USA Ticket number B220050037, I requested a field meet to go over the project limits with all utilities. Utiliquest is the only Utility representative that did not show up or call.

On January 10, 2022 I sent in the first "No Response" Ticket to USA. Later that day a Tech. from Utiliquest called and stated that he would have everything marked by the end of the day on January 12th. (See Email chain of 01-11-22)

I have sent in a No Response Ticket almost every day since.

On January 18, 2022, I call the phone number provided on the Ticket and spoke with the operator for Utiliquest. He advised that I call the field supervisor for that area, Gabriel Gonzales, which I did. Mr. Gonzales stated that Utiliquest was waiting on Frontier and that there was nothing that he could do to expedite.

Please let me know if you need any additional information.

THANK YOU FOR YOUR HELP

Subject: Complaint C220180003; Case 22LA01484 -- Request for information

Mr. Johnson,

We have opened a case into your complaint from yesterday, and I am assigned to perform the investigation. Thank you for speaking with me this morning. Could you provide some information to assist us in pursuing this investigation? Particularly, could you provide

- The ticket number for the excavation
- Any written correspondence you had with Frontier or their contract locator UtiliQuest, including their responses
- A brief description of any verbal conversations you had with Frontier or UtiliQuest representatives

After reviewing these documents, I'll likely reach out to you for a request to interview.

Thanks,

Tony

**CALIFORNIA UNDERGROUND FACILITIES SAFE EXCAVATION BOARD
INVESTIGATION DIVISION
INTERVIEW REPORT**

REPORT DATE: 2/3/2022

CASE NO: 22LA01484

DATE/TIME OF INTERVIEW: 2/3/2022 10:50 AM

LOCATION OF INTERVIEW: Phone

NAME/ADDRESS OF INTERVIEWEE:

Mike Rivera,
P.O. Box 730
Yucaipa, CA 92399
Tel: 909-721-2462

NARRATIVE:

I spoke with Mike Rivera, Public Works Manager for Yucaipa Valley Water District, regarding Yucaipa Valley Water's lack of response to Ticket B220050037. Rivera stated that, since the URL that allowed electronic response became available on the tickets they receive, he has been telling his guys to respond using the ticket. He said that the ticket he received was out of their grid. I asked if they responded to tickets that were out of his service territory, and he said that they didn't. I informed him of the requirement that they respond to every ticket they receive, and I explained that, while they might have known that the excavation was outside their area, an excavator may not know. Rivera stated that he would tell all of his guys to respond to all tickets they receive. I also explained that, as of January 2021, they need to respond electronically, in addition to any other response they provide, due to a new requirement in law.

I asked him if he was aware that he could contact DigAlert to tighten up the area in which they receive tickets to only their service territory, and he said yes, he was aware, and based on our conversation planned to do so. I asked him if he had contact information for DigAlert, and he said yes, that he had contact information for Ann.

Subject: RE: Client Assistance Request Form for Ticket B220050037

Utiliquest
Dochelle Lewis,

Ticket Number B220050037 was called in at 0658 hrs on 01/05/22.

The "Legal Start": was 01/07/22 at 1701 hrs.

To assist in locating the existing facilities I scheduled a "Meet and Mark" for January 10, 2022 at 0900 (all utilities with the exception of those marked by Utiliquest responded).

At 1013 hrs 01/10/22 I sent in a "NO RESPONSE" Ticket to USA. Approximately one hour after that I received a phone call from a Tech with Utiliquest saying that he needed help to mark the existing facilities, but that he would have them marked by Tuesday afternoon, the 11th. I agreed as long as all marking was complete on Tuesday.

I to can also quote 4216, (although my quote would be correct), but I also know the following:

Utiliquest is not the owner or operator of any Frontier facilities.

All utilities received timely notice of our work per 4216.

Utiliquest chose to ignore that notice and now asks us to wait on them. This now makes it the OPERATORS problem.

The LEGAL START date and time is over four days ago.

I would suggest that the real OPERATOR pull out all of the stops and get their facilities marked prior to when we will be legally starting our work.

You may want to also take a look at 4216.7 (c), (d).

THANK YOU FOR YOUR PROMPT ATTENTION TO THIS

Mr. Marino,

Thank you for returning my call this morning. Attached you will find the following:

1. Copy of the original USA Ticket for the project.
2. Email string from 01-11-22.
3. Email string from 01-19-22.
4. Narrative of conversations.

NARRATIVE

In the original USA Ticket number B220050037, I requested a field meet to go over the project limits with all utilities. Utiliquest is the only Utility representative that did not show up or call.

On January 10, 2022 I sent in the first "No Response" Ticket to USA. Later that day a Tech. from Utiliquest called and stated that he would have everything marked by the end of the day on January 12th. (See Email chain of 01-11-22)

I have sent in a No Response Ticket almost every day since.

On January 18, 2022, I call the phone number provided on the Ticket and spoke with the operator for Utiliquest. He advised that I call the field supervisor for that area, Gabriel Gonzales, which I did. Mr. Gonzales stated that Utiliquest was waiting on Frontier and that there was nothing that he could do to expedite.

Please let me know if you need any additional information.

Hi Tony,

I was able to confirm that the cable was mapped, and the tech found the cable inside the structure without a tracer wire during the course of his locate.

The excavator was on site when we went back to mark the cable and was aware of the 30' section that had conduit in need of fixing before a tracer could be placed. That 30' section was away from his area of concern for the excavation. Our area supervisor also reached out today to make sure he knows.

Thank you

Joe Anton

Joe,

Thanks for answering my questions this afternoon. As we discussed, I am sending two follow-up questions related to how specifically the field technician learned that there was an unlocatable Frontier fiber line in the area of proposed excavation of ticket B220050037.

1. Can you confirm that the fiber line was indicated on the map provided to the technician?
2. Please provide specifics about how the technician identified that the fiber line was unlocatable (e.g. it was on a map but couldn't be found, it could be seen in a handhole or above ground box but had no tracer wire or signal associated with it, etc.)

If you need to ask the technician for the answer to these questions, could you provide the technician's name along with your answer?

Also, I want to reiterate my suggestion that you make sure that the excavator/ticket holder is aware of the 30-ft section of fiber where the tracer wire could not be installed last week and therefore has not yet been marked.

Thank you,

Tony

CAUTION: External

Mr. Anton,

I am investigating a complaint of “no response” against Frontier for ticket B220050037 (and revisions). For your reference, our case number is 22LA01484. My understanding from the complainant (who had made the notification to DigAlert) is that a portion of Frontier’s subsurface installations in the excavation area are fiber without tracer wire, and that the issue has been raised by UtiliQuest to Frontier to address.

I have questions for you, one of your employees more familiar with the ticket, or Frontier to answer.

- The electronic positive response of revision -00B of ticket B220050037 states that Frontier (UTFTRCA01), Spectrum Riverside (UCHTRW_S1), SCE Distribution Desert Region (USCEDE), and SCE Transmission Telecom (USCETT84SE) each negotiated a marking schedule for the ticket. The responder for each is listed as “UQ Responder.” Can you describe how the negotiation took place, and what UtiliQuest staff negotiated with the excavator? Can you describe the parameters of the marking schedule that were agreed upon?
- The electronic positive response of revision -01B of ticket B220050037 states that Frontier responded with “Partially Marked – More Time is Needed.” Was this need discussed with the excavator? When? Can you describe to me why more time was needed?
- The complainant indicated that a UtiliQuest representative—Gabriel Gonzales—had told him that the issue was the lack of tracer wire for a fiber line, and that the issue had been raised to Frontier. Is it true that the line hasn’t been marked as of today due to an absence of tracer wire? How did UtiliQuest employees discover the issue? Has UtiliQuest contacted Frontier about the issue? When was the contact with Frontier made? To whom at Frontier was this information provided?
- Can you provide an appropriate person at Frontier for me to contact during the course of this investigation?

If you would like to provide answers in writing, that is fine. If you feel a verbal interview more appropriate to conveying the facts in your possession, I am happy to set one up. If it will take longer than a day to provide the answers to these questions, please let me know with an expected timeline for your response.

Thank you,

Tony

Subject: RE: Client Assistance Request Form for Ticket B220050037

Utiliquest

Dochelle Lewis,

Ticket Number B220050037 was called in at 0658 hrs on 01/05/22.

The "Legal Start": was 01/07/22 at 1701 hrs.

To assist in locating the existing facilities I scheduled a "Meet and Mark" for January 10, 2022 at 0900 (**all utilities with the exception of those marked by Utiliquest responded**).

At 1013 hrs 01/10/22 I sent in a "NO RESPONSE" Ticket to USA. Approximately one hour after that I received a phone call from a Tech with Utiliquest saying that he needed help to mark the existing facilities, but that he would have them marked by Tuesday afternoon, the 11th. I agreed as long as all marking was complete on Tuesday.

I to can also quote 4216, (although my quote would be correct), but I also know the following:

Utiliquest is not the owner or operator of any Frontier facilities.

All utilities received timely notice of our work per 4216.

Utiliquest chose to ignore that notice and now asks us to wait on them. This now makes it the OPERATORS problem.

The LEGAL START date and time is over four days ago.

I would suggest that the real OPERATOR pull out all of the stops and get their facilities marked prior to when we will be legally starting our work.

You may want to also take a look at 4216.7 (c), (d).

THANK YOU FOR YOUR PROMPT ATTENTION TO THIS

This email is regarding ticket B220050037 in the City of Beaumont

At this time the markings for Frontier are incomplete, there are undetectable facilities that we are escalating to our customer.

You are not clear to proceed with any excavation at this time.

Please be patient

California Government Code 4216.7.

(a) If a subsurface installation is damaged by an excavator as a result of failing to comply with Section 4216.2 or 4216.4, or subdivision (b) of Section 42163, or as a result of failing to comply with the operator's (UtiliQuest) requests to protect the subsurface installation as specified by the operator before the start of excavation, the excavator shall be liable to the operator of the subsurface installation for resulting damages, costs, and expenses to the extent the damages, costs, and expenses were caused by the excavator's failure to comply.

REPORT DATE: 2/1/2022

CASE NO: 22LA01484

DATE/TIME OF INTERVIEW: 2/1/2022 2:59 PM

LOCATION OF INTERVIEW: Phone

NAME/ADDRESS OF INTERVIEWEE:

Merlin Johnson,
P.O. Box 777
Mentone, CA 92359
Tel: 9093226061

NARRATIVE:

I called Mr. Johnson to follow up on our previous conversation on 1/21 and find out if the facilities had yet been marked. Johnson indicated that it had been marked. He indicated that Jaime Mesa of Frontier had sent him an email late the previous week that the tracer wire would be installed on the fiber line the next day so that UtiliQuest could mark it. I asked Johnson if he could send me the email, and he said that he would. I asked Johnson if he'd been able to verify that the marks were made, and he indicated that yes, he had seen the new marks on Thursday. I asked him if he had had any issues in the rest of his project, and he said that he'd done a lot of the work in the area that had already been marked and had no problems, and that he hadn't yet begun work in the area of the newly-marked fiber, but would likely do that tomorrow.

**CALIFORNIA UNDERGROUND FACILITIES SAFE EXCAVATION BOARD
INVESTIGATION DIVISION
INTERVIEW REPORT**

REPORT DATE: 2/1/2022

CASE NO: 22LA01484

DATE/TIME OF INTERVIEW: 2/1/2022 3:42 PM

LOCATION OF INTERVIEW: Phone

NAME/ADDRESS OF INTERVIEWEE:

Joseph Anton

Tel: 8582309876

NARRATIVE:

I called Joseph Anton, Regional Manager of Claims and Compliance at UtiliQuest, to follow up on his voicemail left Friday 1/28, in which he was calling to follow up on my 1/19 email that included questions for him regarding Ticket B220050027. I told him that I would be referencing the ticket's electronic positive response data in my questions, and he informed me that he was looking at data input into the UtiliQuest system to answer my questions.

Mr. Anton stated that his system indicates that a UtiliQuest technician spoke with the ticket holder on the 10th, and indicated that they would come out to mark the line the next day. The technician, in the course of locating, identified the unlocatable fiber line. This information was then passed up to Frontier. Anton indicated that UtiliQuest did what it could do: it located the lines, when it found an unlocatable line it passed that information to Frontier to address, and it kept the excavator informed of the situation. Anton also indicated that he had contact information for a Frontier representative, which I had asked for in my email, and he said he would send it to me by email (and did send it while we were speaking).

I asked Mr. Anton about the "meet and mark" language that the excavator had placed in the "location" field of the ticket. I noted that the comment field was not enabled in new tickets and asked him if it was common for an excavator to use the location field for that purpose. He stated that it happened, but that it wasn't common, and that excavators usually found ways to provide information on the ticket that they wanted to convey. He indicated that sometimes an excavator would immediately re-send a ticket in order to open up the comment field so that they could provide information in it.

I asked Mr. Anton how the technician understood that the line was unlocatable. He stated that the technician identified the unlocatable line during the course of the locate. I asked for more specific information, and Anton said that the locator was able to see it. I asked if this was in the process of opening a hand hole or an above-ground box, and he said yes, that was how the technician would do that, but that he didn't have the specifics identified in the system. I asked if Frontier provided maps to UtiliQuest for technicians to use in locating Frontier facilities. Anton said that yes, they did. I told Anton that I would send a follow-up email requesting specific information about how the technician identified that the fiber line was unlocatable and confirmation that the fiber line was indicated in the maps Frontier provided to UtiliQuest.

I asked Mr. Anton how the lack of a tracer wire was communicated to Frontier. He stated that it was sent to Frontier in a form. I asked if he could provide the form, and he said that he couldn't, but that I could ask Frontier for it.

I asked Mr. Anton if the unlocateable fiber facility was ever marked. He said yes. He stated that he received an email on 1/28 from Frontier's contractor who installed the tracer wire that the work was done, and Anton believed that the work had been performed on 1/27. Anton stated that UtiliQuest marked the facility, except for 30 ft in which there was a broken conduit and the contractor couldn't get the tracer wire through. He stated that he believed that the conduit would be repaired on the 2nd. I asked if Frontier was doing the repair work, or if a contractor was. Anton stated that he believed that Frontier used a contractor for that work. I asked if he knew who the contractor was. He stated that that was a question better answered by Frontier. I asked if he knew who the contractor was that installed the tracer wire, and Anton stated that he believed it was SECC, but that Frontier would be able to confirm.

I asked Mr. Anton if the excavator has been notified of the 30 feet of fiber that has not yet been marked. Anton said he didn't know but thought maybe the excavator hadn't been notified. I suggested to Anton that he make sure that the excavator was notified. Anton agreed.

I stated to Mr. Anton that my last series of questions would revolve around an electronic positive response provided by UtiliQuest on behalf of Frontier on 1/20 to ticket version 08B. I asked if he could explain how the electronic positive response at 12:37pm on 1/20 was listed as "locate area marked" if UtiliQuest didn't mark the area until after the tracer wire was installed on 1/27 or 1/28. Anton stated that the response may have been an error, as the excavation area was only partially marked. I asked if, given the facts we'd discussed, the code of "partially marked – more time is needed" may have been the more appropriate response, and he agreed that yes, a response of partially marked would have been more appropriate. Anton stated that, despite what the code may have said, the UtiliQuest supervisor had been in regular communication with the excavator and the excavator was aware that it hadn't all been marked. I asked if his information showed any communication with the excavator related to that electronic positive response. He said that it didn't. I asked if all communications with the excavator are logged, or if field personnel had informal communications that are not logged. Anton indicated that there are so many communications, and no, not all communications were logged.

Finally, I asked Mr. Anton if he is generally the best person to contact if I or another investigator had questions on an investigation that involved UtiliQuest. Anton stated that yes, he generally had the most information and was the best person to talk to.

Mentone, CA 92359
Tel: 9093226061

NARRATIVE:

I contacted Merlin Johnson via phone and asked him a few questions. I asked if he had had any issues with the project since we'd last spoken, and he indicated that he had finished the project with no issues. I asked if he was aware of the issue where Frontier didn't mark approximately 30 feet of fiber because of a broken conduit, and he said that he was aware, that he had spoken to UtiliQuest representatives, but that he wasn't working in that area and so didn't need it marked. He said that they left the section without tracer wire and stated that he hoped they would have fixed it by the time the next person needs to excavate in the area. I asked if he thought he would have been aware if they came out to repair the conduit, and he said yes, he was around the area frequently enough to have been aware.

Amber, can you run a report to identify any tickets that spatially overlap B220050037? I am looking to see if there were any other tickets in the same area (Noble Creek Park) from January 10 through today. One of the companies may have been requested by SECC. I don't know if that is an easy or a difficult search to do.

Thanks,

Tony

Subject: Request for EPR for ticket B220050037

Amber, could you assist in providing the EPR for all versions of ticket B220050037. I can grab it off your website, but it ends up being very difficult to make that version ADA compliant, unlike your internal system EPR reports. For your records, this is for investigation 22LA01484.

Thanks,

Tony

To: bin.liang@ftr.com
Subject: Request for information regarding excavation ticket B220050037; Underground Safety Board Case 22LA014084

Mr. Liang,

I'm investigating a no/late response complaint for ticket B220050037, in which the ticket holder alleged that Frontier did not provide markings by the legal start date and time. For your reference, this is for case 22LA01484. I spoke with Joe Anton of UtiliQuest earlier this week, and he provided your information as the best person to talk to at Frontier.

These questions are for you or another Frontier employee familiar with the circumstances surrounding the ticket.

First, could you let me know if my understanding of the situation is correct? My understanding is that UtiliQuest, in the course of locate and mark activities for Frontier, discovered a Frontier fiber line that was unlocatable due to lack of a tracer wire. UtiliQuest notified Frontier, and Frontier had a contractor install a tracer wire. That contractor installed tracer wire for most of the length of fiber, but was not able to install tracer wire for an approximately 30-foot length of fiber, due to a break in the conduit. Frontier had another contractor repair the line—which may have happened yesterday—to allow tracer wire to be installed in that 30-foot section. Let me know if all of this is accurate, or if there are any facts that I don't have or am misunderstanding.

Second, here are my specific questions:

- Could you provide the report that UtiliQuest provided to you that informed you of the unlocatable facility? Mr. Anton indicated that he could not provide it and so I should ask someone at Frontier.
- Could you provide the names of the companies that installed the tracer wire and repaired the conduit? Did either or both jobs require excavation? If so, could you provide me the ticket

numbers?

- Were maps identifying the location of the fiber line provided to the companies installing tracer wire and repairing the conduit? If so, could you provide whatever maps were provided to those companies?
- Could you provide a timeline of the following relevant dates:
 - When Frontier was notified by UtiliQuest that it had an unlocatable fiber line
 - When Frontier contacted the company assigned with installing the tracer wire
 - When the tracer wire was installed, except for where it could not be installed due to a damaged conduit
 - When Frontier was notified that a damage in conduit prevented the company installing the tracer wire from completing the job
 - When the damage conduit was repaired
 - When the tracer wire installation was completed

If you would like to provide answers in writing, that is fine. If you feel a verbal interview would be more appropriate to conveying the facts in your possession, I am happy to set one up. If it will take longer than the end of the week to provide answers to these questions, please let me know with an expected timeline for your response.

Thank you,
Tony

Tony,

Below is the Positive Response dated (01-20-22 at 1237) stating "Locate Area Marked". This impossible because Jaime Mesa's email of 01-27-22 states that the "Tracer Wire" will not be installed until 01-28-22.

Let me know if you need anything else.

THANKS

Subject: RE: DigAlert electronic positive response procedure: Investigation 22LA01484
Date: Thursday, March 3, 2022 9:31:46 AM

Tony

If there are any EPRs done after the legal excavation start date and time those are sent immediately to the excavator email and/or sms (again if they have asked that the information be sent to them). All ticket/EPR sending processes are automated

We decided not to send as they came in before the excavation start date and time as we felt the excavator might start ignoring the notices if they kept getting “updates” on the EPRs – an excavator can look on line at any time to see the latest even before the legal excavation start date and time

Hope that helps.

Thanks,

Ann Diamond, President

Subject: DigAlert electronic positive response procedure: Investigation 22LA01484

Ann,

I have a question for you regarding DigAlert electronic positive response procedures, in connection with Board Investigation 22LA01484.

On your website, I see that DigAlert sends electronic positive response information to the excavator at the legal start date and time: “DigAlert will email the excavator at the start date and time listed on the ticket a complete status of responses, if the excavator has supplied an email address on the ticket.” <https://docs.digalert.org/display/WebSrv/Electronic+Positive+Response>

- Does DigAlert update an excavator via email when DigAlert receives an electronic positive

response AFTER the legal start date and time (assuming the excavator has provided their email)?
Is this an automated process?

Thank you,
Tony

**CALIFORNIA UNDERGROUND FACILITIES SAFE EXCAVATION BOARD
INVESTIGATION DIVISION
INTERVIEW REPORT**

REPORT DATE: 2/1/2022

CASE NO: 22LA01484

DATE/TIME OF INTERVIEW: 1/21/2022 9:19 AM

LOCATION OF INTERVIEW: Phone

NAME/ADDRESS OF INTERVIEWEE:

Merlin Johnson,
P.O. Box 777
Mentone, CA 92359
Tel: 9093226061

NARRATIVE:

I contacted Mr. Johnson to inform him that if Yucaipa Valley Water has not responded to his ticket, he could not begin work. I informed him that statute requires response from all members who receive the excavation notification, and an excavator can't begin working until the excavator receives those responses, so he might wish to be proactive in confirming with Yucaipa Valley Water that they had no facilities in the proposed work area.

Mr. Johnson indicated that he'd just received an electronic positive response the day before indicating that the locate area was marked, when he had seen that the portion of the area that still needed to be marked was not yet marked. He stated that he contacted Gabriel Gonzales at UtiliQuest and Gonzales agreed that the area that needed marked was still not marked. Johnson indicated that Gonzales had indicated to him that Gonzales was in contact with someone named Jaime Mesa of Frontier on the issue. I indicated to Mr. Johnson that I'd likely contact him the following week to follow up to see if the line was marked.

Thank you Joe.

I have another follow-up question on ticket B220050037-01B. Can you explain the responses from UtiliQuest on behalf of Spectrum, the two Southern California Edison divisions, and Frontier at around 11:42 am on January 10 that each indicate "Clear – No Conflict"? For each of them, there were follow-up responses (one at 3:51pm that afternoon for a scheduled meet and another mid-morning the next day). All but Spectrum had a follow-up message that indicated that there were lines in the area to be marked. Can you help me understand why there was an initial indication on January 10 of "Clear – No Conflict"?

Thanks,
Tony

Subject: Re: Request for information regarding ticket B220050037; Underground Safety Board Case 22LA014084

Hi Tony,

I was able to confirm that the cable was mapped, and the tech found the cable inside the structure without a tracer wire during the course of his locate.

The excavator was on site when we went back to mark the cable and was aware of the 30' section that had conduit in need of fixing before a tracer could be placed. That 30' section was away from his area of concern for the excavation. Our area supervisor also reached out today to make sure he knows.

Thank you

Joe Anton

Joe,

Thanks for answering my questions this afternoon. As we discussed, I am sending two follow-up questions related to how specifically the field technician learned that there was an unlocatable Frontier fiber line in the area of proposed excavation of ticket B220050037.

1. Can you confirm that the fiber line was indicated on the map provided to the technician?
2. Please provide specifics about how the technician identified that the fiber line was unlocatable (*e.g.* it was on a map but couldn't be found, it could be seen in a handhole or above ground box but had no tracer wire or signal associated with it, etc.)

If you need to ask the technician for the answer to these questions, could you provide the technician's name along with your answer?

Also, I want to reiterate my suggestion that you make sure that the excavator/ticket holder is aware of the 30-ft section of fiber where the tracer wire could not be installed last week and therefore has not yet been marked.

Thank you,
Tony

CAUTION: External

Mr. Anton,

I am investigating a complaint of “no response” against Frontier for ticket B220050037 (and revisions). For your reference, our case number is 22LA01484. My understanding from the complainant (who had made the notification to DigAlert) is that a portion of Frontier’s subsurface installations in the excavation area are fiber without tracer wire, and that the issue has been raised by UtiliQuest to Frontier to address.

I have questions for you, one of your employees more familiar with the ticket, or Frontier to answer.

- The electronic positive response of revision -00B of ticket B220050037 states that Frontier (UTFTRCA01), Spectrum Riverside (UCHTRW_S1), SCE Distribution Desert Region (USCEDE), and SCE Transmission Telecom (USCETT84SE) each negotiated a marking schedule for the ticket. The responder for each is listed as “UQ Responder.” Can you describe how the negotiation took place, and what UtiliQuest staff negotiated with the excavator? Can you describe the parameters of the marking schedule that were agreed upon?
- The electronic positive response of revision -01B of ticket B220050037 states that Frontier responded with “Partially Marked – More Time is Needed.” Was this need discussed with the excavator? When? Can you describe to me why more time was needed?
- The complainant indicated that a UtiliQuest representative—Gabriel Gonzales—had told him that the issue was the lack of tracer wire for a fiber line, and that the issue had been raised to Frontier. Is it true that the line hasn’t been marked as of today due to an absence of tracer wire? How did UtiliQuest employees discover the issue? Has UtiliQuest contacted Frontier about the issue? When was the contact with Frontier made? To whom at Frontier was this information provided?
- Can you provide an appropriate person at Frontier for me to contact during the course of this investigation?

If you would like to provide answers in writing, that is fine. If you feel a verbal interview more appropriate to conveying the facts in your possession, I am happy to set one up. If it will take longer than a day to provide the answers to these questions, please let me know with an expected timeline for your response.

Thank you,
Tony
