Date: December 2, 2022

Re: **2023 Wildfire Mitigation Plan Submission Template**

This letter provides an update on the 2023 Wildfire Mitigation Plan Submission Template.

Energy Safety is preparing a Microsoft Word version of the Final 2023-2025 WMP Technical Guidelines as a Submission Template. The Submission Template is a tool that the electrical corporations may use to prepare their 2023 WMP submissions. The electrical corporations are not required to use the template. Regardless of whether an electrical corporation elects to use the Submission Template, it must meet all the applicable requirements set forth in the 2023-2025 WMP Guidelines.

The Submission Template will not introduce any new WMP requirements. As such, Energy Safety will not be taking public comment on the Submission Template.

Energy Safety will send the Submission Template to the electrical corporations shortly after the adoption and of the 2023-2025 WMP Guidelines. Stakeholders and members of the public may request a copy of the template by emailing safetypolicy@energysafety.ca.gov.

Sincerely,

Lucy Morgans
Program Manager, Electric Safety Policy Division
Office of Energy Infrastructure Safety
