Re: **Inadvertent Upload of Confidential Data**
Docket: #2022-WMP-DRs

To all relevant stakeholders:

On February 25, 2022, PG&E inadvertently uploaded to our website a data request response containing confidential data. This data request response, CalAdvocates-PGE-2022WMP-04 Response No. 2, included geographic information system (GIS) files that contained confidential critical energy infrastructure information (CEII). Upon realizing this issue, we removed the publicly available response from our website. We are now notifying the stakeholders to the 2022 WMP process who received copies of this data request that this information must be either maintained as confidential or that all copies must be deleted from all computer systems.

If you have downloaded a copy of this data request response from our website, please reach out to Andrew Ace at andrew.ace@pge.com so that: (1) we can provide you with a non-disclosure agreement (if not already possessed by you) to allow you to keep the confidential data request response; or (2) to notify us that you are deleting all copies of the confidential response.

We greatly appreciate your assistance with this matter and apologize for any inconvenience.

Sincerely,

_____/S/_____
