Office of Energy Infrastructure Safety
California Natural Resources Agency
715 P Street, 20th Floor
Sacramento, CA 95814

Dear Office of Energy Infrastructure Safety,

Subject: Southern California Edison's 2023-2025 Wildfire Mitigation Plan

Thank you for the opportunity to provide comments regarding Southern California Edison's (SCE) 2023-2025 Wildfire Mitigation Plan (Plan). The California Department of Fish and Wildlife (CDFW) reviewed the environmental compliance and permitting section of the Plan to ensure SCE demonstrates their understanding of all environmental laws, regulations, and permitting requirements that are relevant to implementation of Plan activities.

CDFW is submitting comments per Public Utilities Code section 8386, subdivision (d), to identify concerns with how SCE addressed the new guidelines in the environmental compliance and permitting section and discuss potential impacts to sensitive fish and wildlife resources.

CDFW ROLE

CDFW is California's Trustee Agency for fish and wildlife resources and holds those resources in trust by statute for all the people of the State. (Fish and G. Code, §§ 711.7, subd. (a) & 1802; Pub. Resources Code, § 21070; Cal. Code Regs., tit. 14, § 15386, subd. (a).) CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species (Fish and G. Code, § 1802.). Similarly, under the California Environmental Quality Act (CEQA), CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on activities that have the potential to adversely affect fish and wildlife resources.

CDFW is also submitting comments as a Responsible Agency under CEQA. (Pub. Resources Code, § 21069; Cal. Code Regs., tit. 14, § 15381.) Many of the Plan's activities can be conducted using existing exemptions. However, work conducted under the Plan may still be subject to Fish and Game Code section 1600 et seq. (Lake and Streambed Alteration) or may result in "take", as defined by State law, of any species

Conserving California's Wildlife Since 1870

protected under the California Endangered Species Act (CESA) (Fish & G. Code, § 2050 et seq.) Discretionary approvals from CDFW are subject to the requirements of CEQA (Cal. Code Regs., tit. 14, § 15268, subd. (d)). If subsequent project scoping under the Plan identifies elements that may be subject to CDFW's permitting authority, early consultation with CDFW is encouraged. Preparation of CEQA documents to support discretionary actions could lead to extended timeframes for completion of Plan activities.

REGULATORY REQUIREMENTS

California Endangered Species Act

If Plan activities have the potential to result in take of plants or animals listed under CESA (Fish and G. Code, § 2080 et seq.), compliance with CESA is required, either through full avoidance measures or obtaining take coverage through a CESA Incidental Take Permit (ITP). Section 2081, subdivision (b), of the Fish and Game Code allows CDFW to authorize take of species listed as endangered, threatened, or candidate if that take is incidental to otherwise lawful activities and if certain conditions are met. If Plan activities may impact CESA listed species, early consultation with CDFW is encouraged, as modification to Plan activities and mitigation measures may be required to obtain a CESA ITP.

Fully Protected Species

Certain species are Fully Protected and may not be taken or possessed at any time as per Fish and Game Code sections 3511 (birds), 4700 (mammals), 5050 (reptiles and amphibians), and 5515 (fish). The lone exception to these statutes is Fish and Game Code section 2835 which allows the take of Fully Protected species under a Natural Community Conservation Plan (NCCP).

Birds

Fish and Game Code section 3503 makes it unlawful to take, possess, or needlessly destroy the nests or eggs of any bird, while Fish and Game Code section 3503.5 states that no birds-of-prey or their nests and eggs may be taken, possessed, or destroyed. Fish and Game Code section 3513 makes it unlawful to take or possess any migratory nongame bird as designated in the federal Migratory Bird Treaty Act (MBTA) (16 U.S.C. § 703 et seq.), except as provided by rules or regulations adopted by the Secretary of the Interior under the MBTA. Fish and Game Code section 3800 makes it unlawful to take any nongame bird (i.e., bird that is naturally occurring in California that is not a gamebird, migratory game bird, or fully protected bird) except as provided in the Fish and Game Code.

Lake and Streambed Alteration

CDFW requires a notification of Lake or Streambed Alteration (LSA), pursuant to Fish and Game Code section 1600 et. seq., for Plan activities that may substantially divert or obstruct the natural flow; change or use material from the bed, channel, or bank including associated riparian or wetland resources; or deposit or dispose of material where it may pass into a river, lake, or stream. Work within ephemeral streams, washes,

watercourses with a subsurface flow, and floodplains may also be subject to the requirement to notify.

Pollution

Fish and Game Code sections 5650 and 5652 prohibit the deposition, passage of, or disposal of deleterious materials into the waters of the state, or within 150 feet of the highwater mark of waters of the state. Such materials would include products from vegetation maintenance activities, such as sawdust, shavings, slabs, or edgings, and materials deleterious to fish, plant life, mammals, or bird life, such as gas, oil, and other petroleum-based products, and sediment-laden runoff and erosion from vegetation removal activities if soil stabilization measures are not employed.

OVERVIEW OF NEW GUIDELINES FOR ENVIRONMENTAL COMPLIANCE AND PERMITTING SECTION OF WILDFIRE MITIGATION PLANS

There are four major points that utility companies must cover in the environmental compliance and permitting section of the Wildfire Mitigation Plan:

1. A description of the procedures/processes to ensure compliance with relevant environmental laws, regulations, and permitting requirements, including when consultation with permittees occurs (i.e., at what stage of planning/and or implementation of activities described in the Wildfire Mitigation Plan).
2. Roadblocks encountered relative to environmental laws, regulations, and permitting and how the utility company has, or will, address these roadblocks.
3. Any notable changes to environmental compliance and permitting procedures and processes since the last wildfire mitigation plan submission, and why these changes were made.
4. A table of potentially relevant state and federal agencies that may be responsible for discretionary approval of activities described in the wildfire mitigation plans and relevant environmental laws, regulations, and permitting requirements.

CDFW's comments are specific to how well SCE addressed these four major points in the environmental compliance and permitting section of the Plan.

COMMENTS

Comment 1: Description of procedures/processes to ensure environmental compliance

Based on CDFW's review of the Plan, SCE included a good discussion of procedures and processes for environmental compliance and when consultation with environmental regulatory agencies occurs. However, the use of publicly available agency databases and past environmental survey data gathered by SCE to determine if there is any potential for sensitive environmental resources may not always be sufficient. Most public agency databases for sensitive environmental resources confirm the presence of these resources, but a lack of data does not confirm absence. Therefore, sensitive environmental resources have the potential to be present in an area where Plan

activities are occurring, even when the project does not intersect with these “known regulated environmental resources”. CDFW recommends that SCE consult a combination of reliable data sources, historical and current records, and perform project and/or site-specific habitat assessments and surveys to fully evaluate whether there is a potential intersection of Plan activities with sensitive environmental resources.

Comment 2: Roadblocks to environmental compliance and permitting

Based on CDFW's review of the Plan, SCE included a good discussion of the environmental compliance and permitting roadblocks and the work that SCE is planning or implementing to address these roadblocks.

CDFW appreciates SCE's initiative to protect sensitive environmental resources in their distribution area by applying for a master Lake and Streambed Alteration Agreement.

Comment 3: Table of potentially relevant environmental laws, regulations, and permits, and associated agencies with discretionary authority

Based on CDFW's review of the Plan, SCE included most of the relevant environmental laws and regulations that are associated with CDFW's discretionary approval of Plan activities.

In addition to what was included in the Table 5-6, SCE may need to modify Plan activities with implementation of avoidance measures and/or obtain discretionary approval or permits if the activities have the potential to result in:

- Take or possession of fully protected species (Fish and G. Code, §§ 3511, 4700, 5050, 5515)
- Take of, possession of, or needlessly destroying the nest or eggs of any bird (Fish and G. Code, § 3503)
- Take of, possession of, or destroying any bird-of-prey or their nest or eggs (Fish and G. Code, § 3503.5)
- Take or possession of any migratory nongame bird (Fish and G. Code, § 3513)

Recommendation: Early consultation with CDFW by SCE's environmental and planning staff and early completion of all documentation necessary for CDFW's discretionary review of activities covered under the Plan.

Please note that SCE's service area lies within three of CDFW's regions (Central, South Coast, and Inland Deserts) and consultation, notifications, and other permit documentation regarding Plan activities should be provided to the appropriate region based on the specific location of the activities to be completed. To contact the appropriate CDFW region, please visit <https://wildlife.ca.gov/Regions>.

CONCLUSION

SCE's 2023-2025 Wildfire Mitigation Plan
