These documents have been marked as confidential in red font on the header of the relevant portions of the document. Please note that starting in the second half of 2022, PG&E implemented an internal automated data classification tool which mandates the labeling of all documents and emails with one of four increasing security classifications: public, internal, confidential, and restricted. These classifications serve a purpose separate and apart from advising Energy Safety that certain information is confidential; these classifications are for PG&E data security. For purposes of confidentiality designation, we ask that you please disregard the internal black font labeling at the footer of all documents which is distinguished from the 02.01.23 v1
