

MEMORANDUM

To: Electrical Undergrounding Plans Stakeholders

From: Kristin Ralff Douglas

Date: October 27, 2023

Re: **Save the Dates: November 7, 14, 21, 28 and December 5, 2023**

The Office of Energy Infrastructure Safety (Energy Safety) will hold a series of working group meetings in November and December 2023 on development of guidelines for submission of 10-Year Electrical Undergrounding Distribution Infrastructure Plans (Undergrounding Plan). Large electrical corporations may submit Undergrounding Plans pursuant to Senate Bill 884.

These meetings will be structured as working groups to provide an opportunity for focused discussion by stakeholders. This format is intended to provide the potential for stakeholders' positions to develop as they hear from others. The first working group will focus on comments received in response to the October 23, 2023 Request for Comments. Topics for the remaining meetings will be determined in November.

The meetings will be virtual, taking place each Tuesday from 10 to 12 noon.

- November 7, 2023
- November 14, 2023
- November 21, 2023
- November 28, 2023
- December 5, 2023 (if necessary)

Additional details about these meetings, including an agenda and details on how to attend remotely, will be e-filed to Energy Safety's Undergrounding Plans docket (#2023-UP).

Sincerely,

Kristin Ralff Douglas
Program Manager, Electrical Undergrounding Division
Office of Energy Infrastructure Safety
