SUBJECT: REGARDING PG&E’S ADJUSTMENTS TO ITS WDRM

QUESTION 003

In its 2025 WMP Update, PG&E discusses the changes made between its Wildfire Distribution Risk Model (WDRM) Version 3 (V3) to Version 4 (V4). Based off those changes, provide:

- a. An updated version of Table 6-5 from its 2023-2025 WMP based on any changes made to the top risk circuit segments between V3 and V4.
- b. An updated version of Table 7-2 from its 2023-2025 WMP based on any changes made to the top risk circuit segments between V3 and V4.
- c. An updated version of Table 6-5 from its 2023-2025 WMP based on any changes made to the top risk circuit segments between V3 and V4.
- d. An updated version of Figure 7-1 from its 2023-2025 WMP based on any changes made to the top risk circuit segments between V3 and V4.
- e. An updated version of Table 7-4 from its 2023-2025 WMP based on any changes made to the top risk circuit segments between V3 and V4.
- f. A graph demonstrating the overlaid risk scores between V3 and V4, similar to the graph provided in Data Request OEIS-PG&E-22-016 Question 1 showing the difference in output between V2 and V3.

ANSWER 003 SUPPLEMENTAL 01

- a. Please see worksheet “OEIS 016 Q03a” in attachment “*WMP-Discovery2023-2025_DR_OEIS_016-Q003Supp01Atch01.xlsx*” for the requested information.
- b. Please see worksheet “OEIS 016 Q03b” in attachment “*WMP-Discovery2023-2025_DR_OEIS_016-Q003Supp01Atch01.xlsx*” for the requested information.
- c. Please see worksheet “OEIS 016 Q03a” in attachment “*WMP-Discovery2023-2025_DR_OEIS_016-Q003Supp01Atch01.xlsx*” for the requested information.
- d. PG&E would like to amend the response submitted on April 25, 2024, to note that the requested information is unable to be provided by May 8, 2024. Once PG&E started analyzing this request, PG&E realized two weeks was an underestimated

time period to produce this analysis. As with the response to subpart e., PG&E will provide this information once it is available. However, anticipates the analysis taking several months to complete as the WDRM v4 model was only recently released. This information will be provided once it is available.

- e. PG&E will provide this information once it is available. However, PG&E anticipates this analysis taking several months to complete as the WDRM v4 model was only recently released. PG&E will provide this information once it is available.
- f. Please see worksheet "OEIS 016 Q03f" in attachment "*WMP-Discovery2023-2025_DR_OEIS_016-Q003Supp01Atrch01.xlsx*" for the requested information.

ANSWER 003

PG&E released WDRM v4 for use in January of 2024 and is currently evaluating associated work plans in future years anticipated to be described in PG&E's 2026 WMP. Much of the analysis for the tables and figures requested in parts (a) through (f) below are included in this work and are underway. As this analysis only recently started and is still ongoing, parts (a) through (d) and (f) will require more time and part (e) will not be available until later in 2024.

Please let us know if you would like to meet and confer to discuss this request, the work that needs to be done to create the requested information, and why the information is not currently available.

- a. The information being requested is under development and anticipated to be available around May 8, 2024.
- b. The information being requested is under development and anticipated to be available around May 8, 2024.
- c. The information being requested is under development and anticipated to be available around May 8, 2024.
- d. The information being requested is under development and anticipated to be available around May 8, 2024.

PG&E will provide this information once it is available. However, we anticipate this analysis taking several months to complete as the WDRM v4 model was only recently released. We will provide this information once it is available.
