DRU Index #:		Requester:	Brad Hill

SUBJECT: REGARDING EPSS RELIABILITY ANALYSIS

## **QUESTION 001**

Regarding PG&E's response to ACI PG&E-23-26, PG&E states the following in its 2025 WMP Update (p. 132):

PG&E is currently finalizing an analysis to understand the tradeoffs between reliability and wildfire risk mitigation when EPSS circuits are enabled. This analysis should be completed by the second quarter of 2024 to be shared in PG&E's 2024 RAMP filing and will address the portion of the ACI seeking a re-evaluation of PG&E's EPSS-enablement thresholds.

PG&E filed its 2024 RAMP filing on May 15, 2024; is this analysis completed? If yes, what is the format of this analysis that can be provided?

## **ANSWER 001**

Please see Exhibit 4 Chapter 1: "2024 Risk Assessment and Mitigation Phase Report" of PG&E's 2024 RAMP Filing for the initial analysis which presents the impact of the current PG&E EPSS enablement threshold. A further analysis is expected to be shared by the end of the second quarter of 2024 on the re-evaluation of PG&E's EPSS enablement threshold.

PG&E's 2024 RAMP Filing is located at the following link: <a href="https://www.cpuc.ca.gov/media/cpuc-website/divisions/safety-policy-division/reports/2024-ramp-application-pge051524.pdf">https://www.cpuc.ca.gov/media/cpuc-website/divisions/safety-policy-division/reports/2024-ramp-application-pge051524.pdf</a>.
