Re: Request to Correct Information Provided in PG&E's 2024 Change Order for the 2023-2025 Wildfire Mitigation Plan (WMP) (Docket #2023-2025 WMPs)

Dear Deputy Director O'Rourke:

Pacific Gas and Electric Company (PG&E) respectfully requests to correct information provided to the Office of Energy Infrastructure Safety (OEIS) in its 2024 Change Order for our 2023-2025 Base WMP.

This correction involves updating two numbers in our 2024 Change Order. We identified a calculation error in the data file used to estimate the risk reduction associated with the 2024 risk estimates associated with targets GH-01 and GH-04. Specifically, for the 2024 Risk Impact Percentage calculation, we inadvertently failed to apply the 1:1.25 overhead to underground conversion factor, which resulted in an overestimation of the risk reduction estimates. Thus, the correct risk reduction estimates should be as follows:

- The 2024 GH-01 risk reduction estimate should be 1.6% and not 2.0%; and
- The 2024 GH-04 risk reduction estimate should be 1.5% and not 1.8%.

Please note that this error was only associated with the 2024 values for this work and did not affect the 2023 and 2025 values. Similarly, this correction does not impact the PSPS-related targets (including PS-07), which are based on undergrounding miles, not risk reduction.

As a result, we have taken steps to prevent this type of manual error from recurring in the future. We appreciate your consideration of this request to correct our 2024 Change Order. Please do not hesitate to reach out should you need any clarifications or additional materials.

Sincerely,

_____/S/_____

Jay Leyno

Director, Wildfire Mitigation PMO
