Case No.: D223430002

Location of Violation: 1990 Diamond Street in San Francisco, California 94131

Date of Violation: December 9, 2022

Dear Comcast- Northern California :

You are receiving this Notice of Probable Violation (Notice) as a result of an investigation conducted pursuant to Government Code sections 4216 *et seq.* The California Underground Safety Board (Board) investigator has concluded an investigation of an incident on December 9, 2022, near 1990 Diamond Street San Francisco, California 94131, and found the following violations of Government Code section 4216.3(a)(1)(A), 4216.3(b) and California Code of Regulations, title 19, section 4151(c):

Government Code § 4216.3(a)(1)(A): Failure to locate and field mark subsurface installations.

Government Code § 4216.3(b): Failure to remark subsurface installations prior to the legal excavation start date and time.

Cal. Code Regs., title 19, § 4151(c): Refusal to cooperate with the investigation.

Comcast failed to field mark the location of a subsurface installation in response to ticket number X225902277-00X. Because of that failure, the installation was damaged during excavation.

Comcast refused to field mark the work area after receiving the locate request associated with ticket number X225902277-06X based on a claim that the manner of delineation was incorrect.

During the Board's investigation, Comcast gave conflicting reports about the cause of the damage to the line and refused to provide any further information when asked by the Board's investigator. Further, Comcast knowingly misrepresented to the investigator that ticket number 2022121600401 was created because of a problem with USA North's software rather than Comcast's refusal to field mark the work area. Comcast's refusals to cooperate obstructed the investigation.

The evidence establishing these facts is attached to the enclosed report of investigation.
