

[Docket 2023-UPs EUP Guideline Development, Electrical: Undergrounding Plans \(UPs\)](#)

January 6, 2025

Notice of Availability of Electrical Undergrounding Plan Guideline Data Template Files

On January 6, 2025, Energy Safety issued its Second Revised 10-Year Electrical Undergrounding Plan Guidelines (EUP Guidelines) for comment. The EUP Guidelines state that data submission templates will be made available for large electrical corporations. Today Energy Safety is providing sample data submission templates for stakeholder review. The data submission templates are optional for large electrical corporations and will be available for reference separate from the EUP Guidelines. Stakeholders may provide comments on the templates for Energy Safety's consideration. Opening and reply comments on the sample data submission templates are due the same dates as comments on the Second Revised EUP Guidelines.

The sample data submission templates are available on Energy Safety's Electrical Undergrounding Division website at: <https://energysafety.ca.gov/what-we-do/electrical-infrastructure-safety/> <https://energysafety-ca-gov-what-we-do-electrical-infrastructure-safety-electrical-undergrounding-division-sb-884> under EUP Templates and Example Files.
