To Whom it May Concern,

Plumas-Sierra Rural Electric Cooperative (PSREC) is pleased to submit our 2025 Wildfire Mitigation Plan (WMP), in accordance with Public Utilities Code (PUC) Section 8387 (Senate Bill 901). The plan was presented to and approved by the PSREC Board of Directors on June 25th, 2025, to ensure that it complies with all applicable rules, regulations, and standards. PSREC does not anticipate any changes to wildfire risks within its service territory and has no significant updates since its last Wildfire Mitigation Plan (WMP). Based on both historical data and projected wildfire risk, PSREC has determined that its current WMP continues to adequately address these risks, and no substantive changes are warranted for this reporting year. PSREC's WMP will be prominently posted on our website and was made available for public comment during our June board meeting.

PSREC appreciates the efforts and support of the Wildfire Safety Advisory Board in helping to mitigate wildfire risks in California. We look forward to your reviews and recommendations, and we will continue to evaluate our WMP annually.

If you have questions regarding document submittals, please contact me by email at amy.brubaker@psrec.com or at 530-832-6012.

Respectfully submitted,

Amy Brubaker
