## **California Underground Facilities Safe Excavation Board**

July 14-15, 2025

## Agenda Item No. 25 (Action Item) - Staff Report

Idea Submission Form Revision Proposal

#### **PRESENTER**

Jaime Hastings, Policy Manager

#### **AUTHOR**

Chris Peery, Policy Analyst

#### **SUMMARY**

This report consists of a proposal to revise the Idea Submission Form. Staff recommends the Board approve the revised Idea Submission Form. Upon approval, staff will draft an outreach plan to publicize and encourage use of the form.

#### STRATEGIC PLAN

2020 Strategic Plan Objective: Build Board Operations to Achieve Compliance, Reporting, and Operational Excellence in Resource-Efficient Manner

#### **BACKGROUND**

The Underground Safety Board (Board) launched the Idea Submission Form in 2020 to collect frontline and stakeholder input on underground excavation safety. The form was accompanied by an Idea Register<sup>1</sup>, which cataloged submissions by strategic objective. The form provides a structured, accessible way for the regulated public to communicate directly with the Board and submit ideas for review during Board meetings and potential inclusion in future workplans. Since its launch, participation has been limited. The Board has not received a submission in over 18 months. To strengthen this communication channel and support continuous learning and improvement, the following change is proposed for discussion:

Shorten and simplify the Idea Submission Form to reduce barriers to submission

<sup>&</sup>lt;sup>1</sup> See <u>June 8, 2020, Agenda Item No. 3, Implementation of the Idea Submission Form and the Idea Register and February 10, 2020, Agenda Item No. 4, Presentation on the Idea Submission Form and Implementation of the Idea Register</u>

#### **DISCUSSION**

#### **Current Idea Submission Form**

The current Idea Submission Form is shown in Attachment 1. The order of the sections are:

- Background
- Idea
- Benefits, Costs, and Hazards
- Attachments & Data
- Contact Information
- Industry Role

## **Proposed Idea Submission Form**

The proposed Idea Submission Form is shown in Attachment 2. The order of the sections are:

- Contact Information
- Industry Role
- Background
- Idea
- Benefits
- Attachments & Data

#### **Proposed Changes**

The following section includes proposed changes to the Idea Submission Form, grouped into Rearrangements, Revisions, and Removals:

#### Rearrangements

The Contact Information and Industry Role sections have been moved to the top of the form to serve as introductory information and allow for a more natural flow of information.

#### Revisions

Several questions were revised in the Background, Idea, and Data & Attachment sections and the title was revised for the Benefits, Costs, and Hazards section in an effort to be more specific, relatable, ask for more information, and shorten and simplify the document. The changes are more personable; acknowledge that not all concerns are safety related, as some may seek to address efficiency; and directly ask for the submission of documents and data.

## **Removals**

Several questions have been removed throughout the form as they are more suitable for Board staff to research, merged with other questions, redundant, or reliant on other questions that were removed.

#### RECOMMENDATION

Staff recommends the Board discuss the proposed changes to the Idea Submission Form and approve the revised form.
