Re: Alameda Municipal Power 2025 Wildfire Mitigation Plan

To Whom It May Concern:

Under Public Utilities Code (PUC) section 8387(b), local publicly owned electric utilities are required to prepare a Wildfire Mitigation Plan (WMP), present it to their Governing Board, and submit it to the Wildfire Safety Advisory Board (WSAB) by July 1 each year.

Due to recent transitions within the organization, Alameda Municipal Power (AMP) experienced a delay in finalizing and presenting its WMP recommendations before its Governing Board. AMP staff are now scheduled to present to our Governing Board on July 21st, 2025.

AMP does not operate any overhead electric supply facilities within or adjacent to areas designated by the state as “extreme” or “elevated” fire threat zones. Based on this, staff will recommend that the 2024 WMP continues to adequately address the risk of utility-caused wildfires, and that no substantive changes are needed for this reporting year.

AMP will submit a letter to the WSAB outlining this information, along with confirmation of the Governing Board presentation at a public meeting, by July 25th, 2025.

We appreciate your understanding and support as we work to maintain compliance and transparency.

Sincerely,

Alan Harbottle
