Re: Notice of Public Meeting on Alameda Municipal Power Wildfire Mitigation Plan

To Whom It May Concern:

On July 21, 2025, Alameda Municipal Power (AMP) presented its Wildfire Mitigation Plan (WMP) to its Governing Board, the Public Utilities Board, at a publicly noticed meeting in accordance with Public Utilities Code (PUC) section 8387(b). AMP's WMP was most recently adopted on June 17, 2024 is attached with this letter. At the July 21, 2025 meeting AMP provided an opportunity for public comment on its existing WMP and AMP's Governing Board verified that AMP's existing WMP complies with all applicable rules, regulations, and standards, as appropriate.

AMP does not operate any overhead electric supply facilities within or adjacent to areas designated by the state as "extreme" or "elevated" fire threat zones. After review, AMP has determined that the 2024 WMP continues to adequately address the risk of utility-caused wildfires, and no substantive changes are necessary for this reporting year.

As part of its annual metrics reporting, AMP recorded **zero fire ignitions (Metric 1)** and **one wires down event (Metric 2)** in 2024, which was the result of a goose colliding with primary lines.

Thank you for your continued partnership and support in ensuring wildfire safety across California. Should you have any questions or require additional information, please do not hesitate to contact us.

Sincerely,

Alan Harbottle

Acting Assistant General Manager of Engineering & Operations
