## OEIS Data Request 6.1

**Regarding Microgrids:** On page 179 of PacifiCorp’s 2026-2028 WMP, PacifiCorp states that it “performed feasibility studies for the implementation of utility interactive and islanded microgrid solutions at four remote sites serving critical radio communications infrastructure. The studies evaluated loading seasonality potential for onsite generation with photovoltaic and wind resources, storage and identified potential energy deficits requiring the use of propane, natural gas, or diesel generators.”<sup>1</sup>

With the understanding that PacifiCorp is still evaluating the result of these studies, provide copies of the feasibility studies’ reports for these four remote sites. If reports are not available, provide detailed summaries of each of the feasibility studies including the methods used and conclusions drawn.

## 1<sup>st</sup> Supplemental Response to OEIS Data Request 6.1

Further to the Company’s response to OEIS Data Request 6.1 dated August 6, 2025, the Company provides the following additional information:  
Please refer to Confidential Attachment OEIS 6.1-1 1<sup>st</sup> Supplemental through Confidential Attachment OEIS 6.1-4 1<sup>st</sup> Supplemental.

Confidential information is provided to the California Public Utilities Commission (Commission) pursuant to California Public Utilities Code § 583 and General Order 66-D.
