One hundred percent of California reclosers matched between SAP and GIS in the 2024 audit.

Thanks,

Riley Larsen

Subject: GIS DRCLs Missing in SAP

Hello,

After scrubbing through the GIS data, I have been unable to find the devices in the attached file. Can you run these by Tim and Colby in your next meeting and see if they want me to create these and call the work orders for this year? Exceptions would of course be anything created in 2023-2024, and I think there might be a hydraulic one that won't have maintenance.

Thanks,

Riley Larsen
