Case No.: 23NTS0026

Location of Violation: 2527 Bunya Street, Newport Beach, California 92660

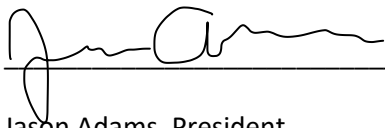

Date of Violation: November 29, 2023

To whom it may concern:

On September 20, 2022, Streamline Construction Inc. formally approved a proposal from Vel Construction Inc. for excavation (trenching and drainage work) at 2527 Bunya Street, Newport Beach, California 92660. It was Streamline Construction Inc.'s understanding that, as the ones performing the excavation, Vel Construction Inc. would follow all necessary procedures and precautions before the work began.

Because Vel Construction Inc. was trenching for drainage that was no deeper than 12 inches, they did not notify DigAlert. When the work commenced on November 29, 2023, Vel Construction Inc damaged a natural gas facility, as the gas line was only 6 inches deep. Streamline Construction Inc. immediately alerted SoCalGas, who arrived at the jobsite right away to make all necessary repairs.

Streamline Construction Inc. recognizes that we should have taken all safety matters into our own hands, rather than trusting that our subcontractor would do so. To avoid any similar situations in the future, we have made it our standard protocol to alert DigAlert ourselves whenever necessary.

A handwritten signature in black ink, appearing to read 'J Adams', is written over a horizontal line.
